This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

THE object of this compilation is simply to invite the attention of American Numismatists to a class of Medals that has hitherto been greatly neglected; a class that is inferior to none in variety and interest, and that has a more immediate bearing on the history of our country than any other.

It may possibly cause some surprise that the medals and tokens relating to the first President should not be included in this series, but several reasons exist that I have thought were sufficient to warrant their exclusion. Most Collectors have made the formation of a Washington Series a separate object of pursuit, and have fixed a standard of valuation differing from that possessed by the pieces I have enumerated. James Ross Snowden, Esq., late director of the United States Mint, has lately published a very complete and admirable work on this series, and those collectors who prefer to commence their Presidential series with the Washington pieces, may, if they please, consider this little work merely a supplement or *addendum* to that of Mr. Snowden. If no other consideration existed, the extent alone of the Washington Series might suffice to separate the two departments, as it consists of a greater number of distinct pieces than the three hundred and sixty mentioned in this volume.

In arranging the medals forming the series, I have adopted the plan of including all pieces bearing the effigy or name of any President since Washington, and of any candidate for that office—excluding the pieces technically known as "mules," and also excluding those whose peculiarities are merely a variation in the milling of the edge, or in the size and thickness of the planchet on which the medal is struck.

I would acknowledge my indebtedness to several collectors, and especially to Mr. Hewitt, for valuable assistance in obtaining material for the catalogue.

Any collector who may be the possessor of varieties not mentioned, will confer a great favor by enclosing a minute description or pencil-rubbing, and addressing Box 270, Brooklyn, N. Y.

White Metal. Size, 14.

NOTES.

JOHN ADAMS.

No. 1. The dies of this medal were never hardened, and the piece exists only in soft metal. It belongs to the series of "Peace Medals" authorised by Congress, and struck at the U. S Mint, for distribution among the Indian tribes With few exceptions, the medals of each administration were made of three different sizes, and a portion were struck in silver. In October, 1861, a number were re-struck in bronze, from the original dies, and may now be obtained by application to the Director of the U S Mint, at prices varying from $2 to $2 50.

2 and 3. Published by Geo. H Lovett, New York, in 1850, at 50 cents in copper and 25 cents in white metal.
